& globally.

Turmeric: The Golden Spice

Turmeric, often referred to as the "Golden Spice", is a vibrant yellow-orange root native to Southeast Asia and a key ingredient in many culinary traditions. Known for its distinct flavour and earthy aroma, turmeric is a staple in Indian cuisine, where it adds colour and depth to dishes like curries and rice.

Beyond its culinary uses, turmeric is celebrated for its health benefits, primarily due to its active compound, curcumin. Curcumin is known for its anti-inflammatory and antioxidant properties, which may support overall health and wellness. Turmeric has been used in traditional medicine for centuries, often touted for its potential to boost immunity, improve digestion, and promote skin health.

Popular Varieties of Finger Turmeric (Whole)

Rajapuri Turmeric Finger:

Rajapuri turmeric finger is a well-known variety of turmeric grown in Sangli, Maharashtra, India. This type is distinguished by its high curcumin content, vibrant colour, and robust flavour.

Salem Turmeric Finger:

Salem turmeric finger is another notable variety of turmeric from the Salem district in Tamil Nadu & Maharashtra, India. This type is known for its unique characteristics and is prized for both culinary and medicinal uses.

Cuddapah Turmeric Finger:

Cuddapah turmeric refer to the rhizomes of the turmeric plant (*Curcuma longa*), which are the underground stems from which the plant grows. These fingers are what we commonly used in cooking and for medicinal purposes.

Nizam Turmeric Finger:

Nizam turmeric finger is a prominent variety of turmeric grown in the Nizamabad district of Telangana, India. This type is well-regarded for its quality and distinctive properties.

Raisins: Nature's Sweet Bites.

Raisins are dried grapes that offer a delightful burst of sweetness and a rich source of nutrients. These tiny, chewy fruits come in various colors, including golden, green, and black, depending on the type of grape used and the drying process.

Raisins have been enjoyed for thousands of years, valued not only for their flavor but also for their health benefits. They are packed with essential vitamins and minerals, including iron, potassium, and antioxidants. These nutrients contribute to various health benefits, such as improved digestion, enhanced bone health, and increased energy levels. Whether you're looking for a quick energy boost or a nutritious addition to your meals, raisins are a delicious and wholesome choice that brings a touch of sweetness to your day.

Indian Golden Raisin

Indian Golden raisins are a high-quality variety of dried grapes from the Sangli district in Maharashtra, India.

They are characterized by their golden colour, plump size, and sweet flavour. Known for their superior quality, they are sun-dried and retain a rich taste and nutritional profile.

Grade: Golden Premium | Golden Round | Golden Long

Indian Green Raisins

Indian green raisins, also known as Kishmish or dried green grapes, are a type of dried fruit made from specific varieties of grapes that are left to dry in the sun. These raisins are characterized by their light green color, sweet flavor, and chewy texture.

Grade: Indian Green Round | Indian Green Long

Popular Varieties of Raisins:

Malayar Raisins

Malayar raisins, often referred to as AAA raisins, are a high-quality variety of dried grapes cultivated primarily in India, particularly in the regions of Maharashtra and Karnataka. Known for their plump size, sweet flavor, and rich golden-brown color, they are favored in both cooking and snacking.

These raisins are prized for their natural sweetness and chewy texture, making them a popular addition to desserts, salads, and various dishes. They are also packed with nutrients, including vitamins, minerals, and antioxidants, which contribute to their health benefits, such as improved digestion and energy levels.

Grade: AAA | AA | A

Jaggery: Nature's Sweetener

Jaggery, a traditional sweetener made from sugarcane juice, is a staple in many cuisines, particularly in South Asia, Southeast Asia, and parts of Africa. Known for its rich, caramel like flavour and natural sweetness, jaggery is often used as a healthier alternative to refined sugar.

Unlike white sugar, jaggery retains essential nutrients due to its minimal processing. It is rich in vitamins and minerals, including iron, calcium, magnesium, and potassium, making it a more nutritious option. Jaggery is believed to aid digestion, boost immunity, and provide a quick energy source. With its unique flavour and health benefits, jaggery not only enhances the taste of dishes but also serves as a wholesome addition to a balanced diet.

Jaggery Powder

Puffed Rice (Kolhapuri Mamara)

Kolhapuri puffed rice, also known as "Kolhapuri Murmura" or "Bhadang," is a popular Indian snack made from puffed rice, often flavored with spices and used in dishes like Bhel Puri or as a standalone snack.
